www.peerless-inc.com

In 1914, Peerless Mill Supply opened as a general line mill supply business, offering the maintenance, repair and operating supplies used by manufacturers of the early 20th century. Through four generations, Peerless has developed the knowledge, skill and processes to creatively tackle any organization's productivity challenges. Innovation in meeting customer needs has always been the cornerstone of the business.

Today, Peerless has evolved into a specialized industrial component supplier that is dedicated to helping the long-term viability and profitability of our customer's operations by providing efficiency, productivity and safety improvements. It is our goal to simply be an **extension of what you do.**

Visit www.peerless-inc.com for more information on products and services, to review specific case studies or to browse through customer testimonials.

opw® Engineered Systems

Loading Systems - OPW is the leading manufacturer of liquid loading systems for loading anything from a tank truck to a rail car to a 55 Gallon drum. Completely engineered systems to fit your exact project requirements. If you're looking to load anything from water to sulfuric acid, and anything in between, OPW can help in providing a safe, efficient loading system.

Quick & Dry Disconnect Couplers - OPW provides a complete line of quick & dry disconnect couplers. Whatever the line size, material, temperature, pressure; for liquids, steam, gas-we have a solution for virtually any application.
